Preface vii

Chemical Vapor Deposition

Metal–organic chemical vapor deposition of copper using hydrated copper formate as a new precursor
M.-J. Mouche, J.-L. Mermet (Grenoble, France), M. Romand and M. Charbonnier (Villeurbanne, France) 1

Selective chemical vapor deposition on excimer-laser-patterned polytetrafluoroethylene from hexafluoroacetylacetonate copper (I) vinyltrimethylsilane
W.L. Perry (Los Alamos, NM, USA), A. Jain, T.T. Kodas and M.J. Hampden-Smith (Albuquerque, NM, USA) . 7

Carrier-gas effects on characteristics of copper chemical vapor deposition using hexafluoro-acetylacetonate-copper (1) trimethylvinylsilane
N. Awaya and Y. Arita (Kanagawa, Japan) 12

In situ mass spectral and IR studies of the role of auxiliary reagents in the enhancement of copper growth in the chemical vapor deposition of Cu(II) β-diketonate precursors
A.E. Kaloyeros, B. Zheng, I. Lou, J. Lau (Albany, NY, USA) and J.W. Hellgeth (Lanham, MD, USA) 20

Reactor transport effects in copper APCVD
J. Wang, R.B. Little, W.G. Lai and G.L. Griffin (Baton Rouge, LA, USA) 31

Hydrogen-atom assisted CVD of copper at low temperatures and in-situ gas-phase spectroscopy studies
W.W. Lee (Santa Clara, CA, USA) and P.S. Locke (Troy, NY, USA) 39

Chemical additives for improved copper chemical vapour deposition processing
J.A.T. Norman, D.A. Roberts, A.K. Hochberg (Carlsbad, CA, USA), P. Smith, G.A. Petersen, J.E. Parmeter, C.A. Apblett (Albuquerque, NM, USA) and T.R. Omstead (Rochester, NY, USA) 46

Selective chemical vapor deposition of copper using (hfac) copper(I) vinyltrimethylsilane in the absence and presence of water
A. Jain (Albuquerque, NM, USA), A.V. Gelatos (Austin, TX, USA), T.T. Kodas, M.J. Hampden-Smith (Albuquerque, NM, USA), R. Marsh and C.J. Mogab (Austin, TX, USA) 52

CVD of copper using copper(I) and copper(II) β-diketonates
M.B. Naik, W.N. Gill, R.H. Wentorf and R.R. Reeves (Troy, NY, USA) 60

Process Integration

Lower temperature plasma etching of Cu using IR light irradiation
Y. Ohshita and N. Hosoi (Ibaraki, Japan) 67

Photolithographic metallization of fluorinated polymers
R.R. Rye, A.J. Howard and A.J. Ricco (Albuquerque, NM, USA) 73

Copper interconnection integration and reliability
C.-K. Hu, B. Luther, F.B. Kaufman, J. Hummel, C. Uzoh and D.J. Pearson (Yorktown Heights, NY, USA) . . . 84

Electroless copper deposition for ULSI
Y. Shacham-Diamand, V. Dubin and M. Angyal (Ithaca, NY, USA) 93

Encapsulated copper interconnection devices using sidewall barriers
D.S. Gardner, J. Onuki, K. Kudoo, Y. Misawa (Ibaraki-ken, Japan) and Q.T. Vu (Santa Clara, CA, USA) 104

Selective CVD-W for capping damascene Cu lines
E.G. Colgan (Yorktown Heights, NY, USA) 120

Elsevier Science S.A.

Reliability, Stability

Thermal stability of copper interconnects fabricated by dry-etching process
Y. Igarashi, T. Yamanobe and T. Ito (Tokyo, Japan) 124

In-situ ultra-high vacuum studies of electromigration in copper films
B.H. Jo and R.W. Vook (Syracuse, NY, USA) 129

Electromigration in copper conductors
J.R. Lloyd and J.J. Clement (Hudson, MA, USA) 135

Thermal strain and stress in copper thin films
R.P. Vinci, E.M. Zielinski and J.C. Bravman (Stanford, CA, USA) 142

Enhanced adhesion of copper to dielectrics via titanium and chromium additions and sacrificial reactions
S.W. Russell, S.A. Rafalski, R.L. Spreitzer, J. Li (Tempe, AZ, USA), M. Moinpour, F. Moghadam (Santa Clara, CA, USA) and T.L. Alford (Tempe, AZ, USA) 154

Diffusion of copper through dielectric films under bias temperature stress
G. Raghavan, C. Chiang, P.B. Anders, S.-M. Tzeng, R. Villasol, G. Bai (Santa Clara, CA, USA), M. Bohr (Hillsboro, OR, USA) and D.B. Fraser (Santa Clara, CA, USA) 168

Thermal stability of on-chip copper interconnect structures
R.J. Gutmann, T.P. Chow (Troy, NY, USA), A.E. Kaloyeros, W.A. Lanford (Albany, NY, USA) and S.P. Muraka (Troy, NY, USA) 177

Reactions, Barriers, Passivation

Room-temperature oxidation of silicon in the presence of Cu_3Si
C.S. Liu and L.J. Chen (Hsinchu, Taiwan) 187

Passivation of Cu via refractory metal nitridation in an ammonia ambient
D. Adams, T.L. Alford, N.D. Theodore, S.W. Russell, R.L. Spreitzer and J.W. Mayer (Tempe, AZ, USA) 199

In-situ measurement of gas-phase reactions during the metal–organic chemical vapor deposition of copper using Fourier-transform infrared spectroscopy
K.-i. Hanaoka, K. Tachibana (Kyoto, Japan) and H. Ohnishi (Hyogo, Japan) 209

W–B–N diffusion barriers for Si/Cu metallizations
J.S. Reid, R.Y. Liu (Pasadena, CA, USA), P.M. Smith (Albuquerque, NM, USA), R.P. Ruiz and M.-A. Nicolet (Pasadena, CA, USA) 218

Cu–metal interfacial interactions during metal organic chemical vapour deposition
G.M. Nuesca and J.A. Kelber (Denton, TX, USA) 224

Low-temperature passivation of copper by doping with Al or Mg
W.A. Lanford (Uppsala, Sweden), P.J. Ding, W. Wang (Albany, NY, USA), S. Hymes and S.P. Muraka (Troy, NY, USA) 234
